

Chairman Powell-

Coming from 3rd generation of Deaf family. VRS is a "blessing" tool for us to communicate with other people who has limited language, mobility, and etc...as a Case Manager for the Deaf Services in Milwaukee. Deaf consumers can use VRS at anytime just like Hearing consumers. We are even. Why different from them? Because we are DEAF? If you limit us, then you need to limit them (Hearing callers) as well. PLEASE take this very seriously and it will impact all over in the nation. In the past, we don't have TTY, now we do...then VRS...due to technology. NO reason to barrier us. Thanks
